PROFILE

Systems administrator and full stack engineer with 4+ years of hands-on experience running Linux servers, databases and live web platforms in Rwanda. I deploy, secure, monitor and support the systems I build, from Ubuntu servers and PostgreSQL databases to public websites and apps used by non-technical staff. Known for calm troubleshooting, clear documentation and patient user support.

CORE SKILLS

Systems & Servers	Linux/Ubuntu Server, users & permissions, shell scripting, service & process management, cloud hosting (VPS, Render, Vercel, Hostinger)
Network & Security	Network operations fundamentals, firewall troubleshooting, access control & RBAC, OTP authentication, data protection (Law No. 058/2021)
Databases & Backup	PostgreSQL, MySQL, Oracle SQL; automated backups with shell scripts; database migration & recovery
Web Administration	HTML5, CSS3, JavaScript, React; deployment, monitoring & log analysis; responsive, accessible design; SEO basics
Support & Training	Hardware, software & connectivity troubleshooting; user onboarding & training; technical documentation & guides
Development	Java, Spring Boot, Python, FastAPI, Node.js, REST APIs, React Native, Git/GitHub

EXPERIENCE

Systems Administrator & Full Stack Engineer

2022 – Present

Freelance & Independent Projects · Kigali, Rwanda

Trackly – Mobile POS & business management platform for Rwandan SMEs *React Native · Spring Boot · PostgreSQL*

- Built and managed the full platform: mobile app, REST API, admin panel and cloud database.
- Administered an Ubuntu 22.04 VPS hosting the API; after losing the server, migrated to Render and Neon PostgreSQL with no loss of code.
- Implemented role-based access (Owner, Manager, Cashier, Viewer), SMS OTP verification and push notifications.

AEGIS – AI-powered IT ticketing system for Adaptive Engineering Group Ltd (AEG) *FastAPI · PostgreSQL · React*

- Built a help-desk platform with Client, Staff and Admin roles, AI ticket auto-assignment and PDF reporting.
- Deployed on Render and Vercel; resolved a firewall rule silently blocking the service and orphaned processes holding ports.
- Implemented secure password reset with email OTP and in-app notifications.

MediGuard – AI-based antibiotic misuse detection for outpatient clinics *Spring Boot · FastAPI · Python ML · React*

- Built with Pharmamed Pharmacy, Kigali: a machine learning service flags risky prescriptions for review.
- Designed a multi-service architecture with role-based dashboards for Admin, Pharmacist and Clinician, protecting sensitive health data.

Websites & Business Systems

- Built and hosted a booking website on Hostinger (Node.js, MySQL); delivered IT Change Management, Community Health Monitoring, School Feeding Tracker, LMS and e-commerce platforms.

Linux System Administrator

2021 – 2023

Freelance · Kigali, Rwanda

- Managed Ubuntu servers for multiple clients; wrote shell scripts to automate backups, updates and reporting.
- Configured user accounts, permissions and access; maintained internal technical documentation.

EDUCATION

BSc. Software Engineering · 2022 – 2026

Adventist University of Central Africa (AUCA)

Graduation: 15 November 2026

Capstone: AI-Based Antibiotic Misuse Detection System

Languages: Kinyarwanda (Native) · English (Fluent)

CERTIFICATIONS

- Introduction to Network Operations – Internet Society
- English Proficiency Certificate – AUCA
